

Question5: Write a program to check if a user's input is positive,negative or zero.

```
#include <iostream>

using namespace std;

int main() {

    int num;

    cout << "Enter a number: ";

    cin >> num;

    if (num > 0) {

        cout << "Positive number.";

    } else if (num < 0) {

        cout << "Negative number.";

    } else {

        cout << "Zero.";

    }

    return 0;

}
```
